SUMMARY

I am a Full Stack Web Developer specializing in the MERN stack and Three.js for building interactive 3D web applications. My experience includes internships at Devsinc and IDEO, along with freelance projects, where I create dynamic and responsive web applications. I am committed to enhancing user experiences and driving innovation in Pakistan's IT sector through cutting-edge technologies.

EXPERIENCE

Node.js Web Development Intern

Ideoversity

📅 08/2024 - Present   📍 Lahore, Pakistan

- Actively exploring advanced Node.js and Express.js concepts, with a focus on unit testing, integration testing, and mastering Test-Driven Development

Web Developer Intern

Devsinc

📅 05/2024 - 07/2024   📍 Lahore,Pakistan

Devsinc is a premier IT company in Pakistan, delivering cutting-edge software solutions to clients worldwide.

- **Full Stack Marketplace Website**: Built with Node.js, Express.js, MongoDB, featuring authentication, RESTful APIs, geo-coding, and file storage with Multer.
- **Responsive E-commerce Website**: Developed a dynamic online store using HTML, CSS, JavaScript, and Tailwind CSS.
- **React Expense Tracker**: Created a React-based expense tracker demonstrating state management and deployment skills.
- **Interactive Games**: Built Tic-Tac-Toe and Rock-Paper-Scissors using JavaScript, HTML, and CSS.
- **Advanced Backend Features**: Implemented session management, authentication, and database handling with Node.js, MongoDB Atlas, Mongoose, and Multer.

Full Stack Developer

Freelancer

📅 05/2022 - 03/2024   📍 Lahore, Pakistan

As a freelancer, developed a large-scale web application using React and Node.js, resulting in a 30% increase in user satisfaction. Built and maintained backend services with Express.js and MongoDB, reducing downtime by 40%. Implemented advanced features and optimizations that increased user engagement by 25%.

- **Enhanced Full-Stack Apps**: Developed features with React and Node.js for a seamless user experience.
- **Backend Optimization**: Improved backend services with Express.js and MongoDB, cutting downtime by 40%.
- **Boosted Engagement**: Integrated features that increased user engagement by 25% and collaborated for timely project delivery.

EDUCATION

BSCS

khawaja Fareed University of Engineering and Information Technology

📅 11/2018 - 02/2023   📍 RYK, Pakistan

Inter Computer Sciences

Khawaja Fareed Collage

📅 2016 - 2018   📍 Philadelphia, PA

PROJECTS

3D Portfolio

Developed a flexible data dashboard web application to visualize and analyze performance metrics. Explore the project at github.com/hjackson/projects/data-dashboard

Marketplace Hub

Developed a full-stack marketplace website using Node.js, Express.js, and MongoDB with features like authentication, authorization, and geo-coding. Enhanced functionality with Multer for file storage and integrated RESTful APIs for seamless user interactions.

GitHub Profile Viewer

Built a GitHub profile viewer using React and Axios to fetch and display profile data and repositories through RESTful APIs. Designed a responsive UI for an interactive user experience.

SKILLS AND INTERESTS

Technical Skills

JavaScript	ReactJs	TypeScript
NoSQL	Restful Api	HTML	NodeJs
